(1).

Employee function:

```java
public class Employee {
    int id;
    String Name;

    Employee(int x, String y) {
        this.id = x;
        this.Name = y;
    }

    void info() {
        System.out.println("Id:" + id);
        System.out.println("Id:" + Name);
    }
```

Main_Employee function:

```java
public class Main_Employee {

    public static void main(String[] args) {
        Employee first=new Employee(4739,"Md Muhasin Ali");
        first.info();
    }
}
```
